Summary

Creative UI/UX Designer who turns complex problems into intuitive, user-centered digital products. Strong across the full design process—user research, wireframing, prototyping, and high-fidelity interface design—with a focus on usability, accessibility, and clear visual hierarchy. Comfortable building and maintaining design systems and translating product goals into seamless user journeys.

Skills & Tools

Design Tools	Figma, Adobe XD, Photoshop, Illustrator, After Effects, Premiere Pro, Rive
UX Design	Wireframing, Prototyping, User Research, Interaction Design, Design Systems, Information Architecture, Usability Testing
UI & Motion	Typography, Color Theory, Visual Hierarchy, Accessibility, Responsive Design, Keyframe Animation, Interactive Components
AI for Design	Figma AI, Midjourney, Adobe Firefly, Framer AI
Other	HTML, CSS, JavaScript, Tableau, Power BI

Project

Daily Recall (Recall AI) — Reading-Retention Mobile App Feb 2026

Solo Product & UX Designer | Designed & Prototyped in Figma

- Designed a reading-retention app that scans a page a user reads and converts it into **AI summaries, a word game, and spaced flashcards**—so a highlighted idea is actually remembered, not lost.
- Owned the end-to-end **capture** → **insight** → **recall** loop: ran user interviews with heavy highlighters who retain little, defined the core problem, and mapped the flows before building UI.
- Built high-fidelity screens and an interactive prototype covering page capture, summary generation, the daily flashcard review, and an in-app word game for active recall.
- Rebuilt the design as a working prototype and ran **usability testing with the same users interviewed**, iterating on the capture and review flows to reduce friction and improve retention.

Education

Guru Nanak Institute of Technology — B.Tech, Undergraduate Studies 2022 – Aug 2026

CGPA: 7.5 / 10

Certifications

Google UX Design Professional Certificate — Coursera

- Foundations of UX Design; UX Design Process: Empathize, Define, Ideate.
- Build Wireframes & Low-Fidelity Prototypes; Conduct UX Research and Test Early Concepts.

Web Design for Web Developers: Build Beautiful Websites — Udemy

- Web design fundamentals: layout, spacing, typography and color for the web; responsive design principles and building clean, usable website UIs.

Product Design: From Idea to Execution — LinkedIn Learning

- End-to-end product design process: identifying user problems, ideation, prototyping, validation, and shipping design decisions tied to product goals.
